Groke

DESIGN & STYLE

MODERN & TIMELESS
LIGHT & ELEGANT

PERFECT DESIGN. CUTTING-EDGE TECHNOLOGY. ATTRACTIVE PRICES.

Groke home entrance doors made of thermally insulated aluminium profiles are among the best products available on the German market for architectural elements.

The doors reflect our emphasis on superior workmanship, attractive designs, durability, reliability and value retention. Groke home entrance doors are manufactured to meet our company's strict internal standards and are the result of over 100 years of experience in the field of metal fabrication.

With us, you're sure to find inspiration. After all, a stylish home begins at the front door!

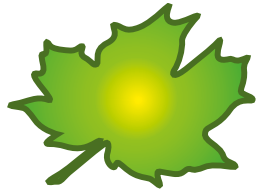

TEST CERTIFICATES

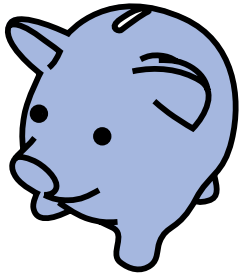

All Groke aluminium front doors meet the requirements of the EN 14351-1 European door product standard for external doors, as confirmed by an accredited independent testing institute.

The latest advances in areas of quality, functionality and safety are a part of your exterior door, which means that you get a truly superior product – one that will also retain its value for years to come.

Our test certificates are available from the download page of our website at **www.groke.de**.

USING ENERGY-SAVING THERMAL INSULATION ON FRONT DOORS SAVES COLD HARD CASH

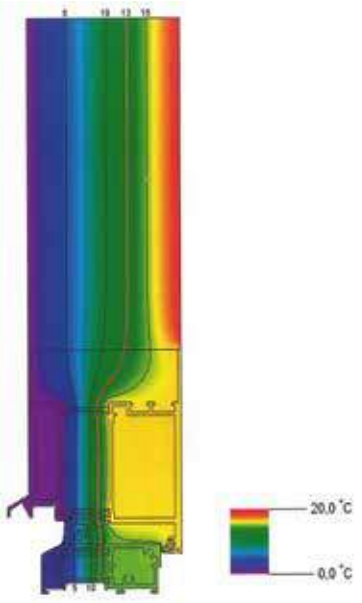

It's a simple equation: high thermal insulation equals low energy costs. Most building codes and environmental regulations call for high levels of thermal insulation. The thermally insulated Groke aluminium exterior door has a low U_d value. And the lower the U_d value, the lower the heat and energy losses.

Front doors from Groke include outstanding thermal insulation as a standard feature. The use of the optimally insulated Groketherm "GT 90" Symphonie and Arcade 3-chamber profile system with added insulation in the insulation zone translates into full compliance with energy savings regulations.

You can find the U_d values for the Groke front door model of your choice in the tables provided next to the models (Index 2). A door's U_d value / heat transfer coefficient is calculated from the following information:

>> U_g = thermal insulation value for glazing
>> U_p = thermal insulation value for door panel
>> U_f = thermal insulation value for profiles

(Calculated in accordance with DIN EN ISO 10077-1. The calculated U_d values are based on a door with an aluminium panel and dimensions of 1100 mm x 2100 mm).

SECURITY PINS

- Two pin retainers in the upper and lower part of the hinge side prevent the door from being pried out of the frame in the event of a burglary

HINGE-PLATE SCREW IN THE PROFILE CHAMBER

- Does not interrupt the sealing layers
- Easy door removal

CIRCULAR KEY ROSETTE

- Stainless steel circular key rosette on exterior
- Profile cylinder lock with emergency function

HINGES (3 PCS)

- Three-dimensional adjustment possible without removing door
- Elegant design
- Supports door leaf weighing up to 160 kg (per hinge)

EXTREMELY STABLE CORNER JOINTS

- Mitred profiles are screwed, glued and bolted together

INTERIOR DOOR HANDLE

- Attractive aluminium lever handle with return mechanism on an oval rosette

STRIKE PLATES

- Innovative strike plate accommodates optional electric opener (radius latch)
- Minimised recess for an improved appearance
- Does not interrupt the sealing layer

3-POINT HOOK BOLT LOCK

- Standard feature
- Ideal for enhanced security

GROKE EXTERIOR DOOR TECHNOLOGY: GREATER STABILITY, MORE THERMAL INSULATION, BETTER SEALING & SUPERIOR SOUND INSULATION

Groke aluminium front doors impress with their stability and sturdiness thanks to a depth of 90 mm and material thicknesses of up to 3 mm. The heaviness of the door gives an impression of genuine quality. A stable joint between the frame and sill facilitates installation and ensures that the structure will be extremely resilient and durable.

As a standard feature, three sealing layers along the entire edge of the door provide a high level of wind and weather proofing. Only a tightly sealed door offers proper thermal and sound insulation, and a Groke front door is as well sealed as any window. Have a look at the product features and see for yourself.

PANEL 42/94 MM

- Highly insulated with thermal foam, depending on the profile type

3 SEALING LEVELS

- Four-sided continuous centre bar and interior seals along entire edge
- Three-sided exterior seal along edge

DOOR SILL

- Thermally insulated aluminium door sill for older buildings (standard)
- For new buildings: PVC floor recess profiles 25/50/100 mm, can be combined as needed (surcharge)

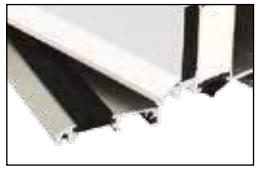

INSULATION ZONE WITH ADDED INSULATION

- Extremely high thermal insulation value

WALL THICKNESS OF UP TO 3 MM

- Torsion-resistant profile
- Extremely high structural stability

WEATHER STRIP

- Drains water away from sill area
- Riveted to door panel

MOUNTING SLOT

- For concealed frame screws
- No screw heads visible
- Easy to install

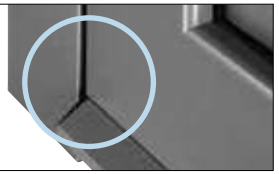

VISUALLY ATTRACTIVE, WITHOUT COMPROMISING FUNCTIONALITY

High thermal insulation values are essential in times of rising energy costs. Depending on the specific profile used, Groke doors can achieve U_d values of less than 1.0 W/m²K. This number can even drop below 0.71 W/m²K if the door leaf frame is covered on both sides. This means that Groke provides an ideal combination of style and thermal insulation for the entrance to your home.

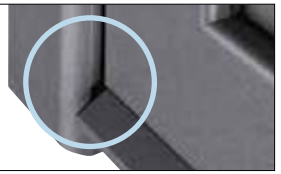

CHOOSE BETWEEN:

ARCADE MODEL
(flush door frame)

SYMPHONIE MODEL
(rounded door frame)

ARCADE MODEL* (GLAZING REBATE PANEL)

Door panel aluminium
Thickness 42 mm
Glazing: triple thermal insulation glazing P4A / WSG 9.5 mm on exterior / decorative pane in middle / float on interior

***Arcade model** also available with door leaf frame covered on both sides.

DOOR LEAF FRAME COVERED ON BOTH SIDES EXTERIOR AND INTERIOR

Door panel aluminium
Thickness 94 mm
Glazing: triple thermal insulation glazing P4A / WSG 9.5 mm on exterior / decorative pane in middle / float on interior

***Symphonie model** also available with glazing rebate panel.

YOUR EXTRA PERSONAL TOUCH

Want to modify a particular model so that the door leaf frame is concealed? With or without base trim in a stainless steel finish, and perhaps a custom colour? Or are you looking for a different glass type? Your options for an individual look are virtually limitless.

CONCEALED LEAF FRAME

Variation of the basic model that gives the front door a smoother and more expansive appearance. The door panel covers the entire door leaf frame, which is otherwise visible with a glazing rebate panel.

GLASS

Insulated glazing with 9.5 mm P4A laminated safety glass and customisable decorative glass panels.

BASE

Create your own unique front door with stainless steel finish base trim featuring a matt full plate design with optional round or square cut-outs.

12530 **Door** similar to RAL 5012 (light blue) | **Trim** on base with stainless steel finish

SIDE SECTION / FANLIGHT

Variations are available with fixed side sections and fanlights in different designs.

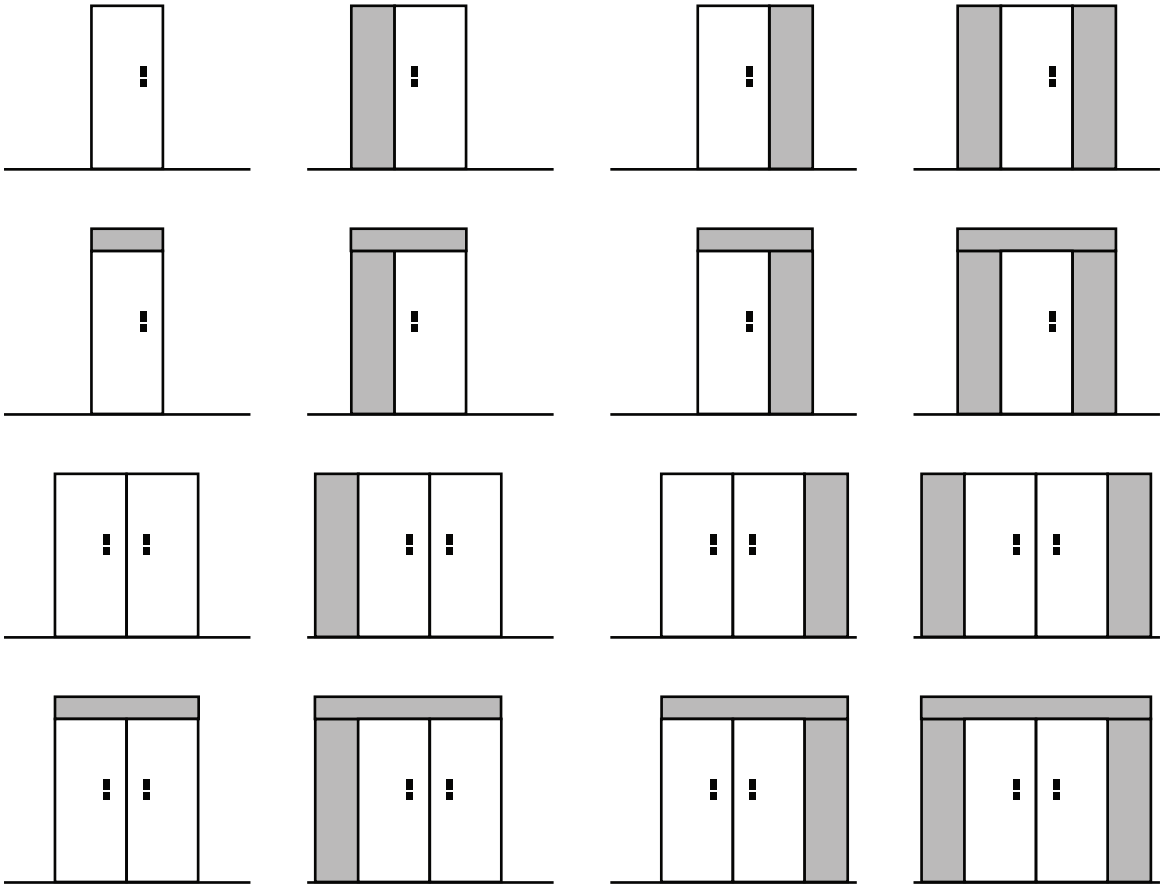

12410 similar to RAL 9016 (traffic white) with fanlight

12541 similar to. RAL 9016 (traffic white) with side section

12400 similar to RAL 9016 (traffic white) with two side sections

Standard feature three-point hook bolt lock

Automatic lock GU Secury

Example: integrated safety catch

SAFETY FOR YOUR ENTIRE HOME

Modern locking technology ensures outstanding protection against break-ins. As a standard feature, our doors include a three-point hook bolt lock that is equipped with an upper and lower claw bolt. The GU Secury automatic lock is also available as an option. Two pin retainers (standard), one each in the upper and lower part of the hinge side, prevent the door from being pried out of the frame.

A range of additional security components is available on request.

LOCKS

CLOSING HOOK

The standard 3-point hook bolt lock offers a saw-proof multiple lock which hooks in the rear striker plate with two upward-locking closing hooks.

"Safe locking thanks to closing hooks!"

20066

+ 3-point hook bolt lock

DOUBLE BOLT

The 5-point hook bolt lock unites all advantages of the closing hook and solid bolt systems in a "double bolt".

"Double holds better!"

20070

+ 5-point hook bolt lock

SECURY AUTOMATIC LATCHBOLT

The convenient GU-SECURY automatic lock system. Simply let the door click shut: The automatic latchbolts trigger 20 mm after the door is pulled shut and are then secured against pushing back movements - the door is locked without having to lock up. The lock systems can be opened from inside at any time with a lever handle and from outside with a turn the key.

"Secured without locking up!"

20027

+ Secury automatic lock
+ With 3-point deadlocked latchbolt
+ Minimum door height 1,900 mm

AUTO OPENER

The self-locking GU-SECURY multiple lock can also be equipped with an opening motor as an option.

The locked door is unlocked from a distance, e.g. with the button of the front door intercom system or buttons from different apartments. It works by moving the automatic latchbolts of the multiple lock back with a motor after pulse generation. It can be combined with any access control system outside. For example, a contact-free system with an electric key (transponder), a door code keypad or a finger scanner. The door can also be opened mechanically with the use of the lock in the closing cylinder.

With a mounted A-opener, the lock system is well-suited for barrier-free buildings in accordance with DIN 18040.

20028

+ Secury automatic lock
+ With 3-point deadlocked latchbolt
+ A-opener function

SAFETY CATCH

The locking system with integrated door catching device and convenient operation with the knob. Particularly well-suited for flat doors and front doors in single-family homes.

SYSTEM ADVANTAGE:

+ No face-fixed lock and no chain
+ Can be locked and unlocked from inside with the knob
+ The safety catch locked from inside can be deactivated from outside via the closing cylinder

Safety catch activated from inside

Safety catch operation with knob

RAL COLOURS IN FINE TEXTURE, TRENDY AND MODERN STYLES

Groke front doors are beautifully powder-coated, and virtually any RAL colour is possible. Our standard colour similar to RAL 9016 traffic white is available in a silky gloss with a brilliance of roughly 70% - 75%. Our fine texture standard colours have a brilliance of roughly 30%. Our current selection of trendy colours can be found here:

The following variations are possible: custom RAL in fine texture, glossy or matt finish (except for "pear colours"), custom RAL on both sides of door and panel (exterior and interior), or custom RAL on door and panel exterior with interior similar to RAL 9016 traffic white.

WHITE ALUMINIUM
similar to RAL 9006

GREY ALUMINIUM
similar to RAL 9007

SPECIAL-EFFECT VARNISH
DB 703

FRONT DOOR CONFIGURATOR - YOUR DREAM DOOR IS JUST A FEW CLICKS AWAY

Naturally, you've got loads of ideas for your new front door. But how can you turn them into reality? And do they really match your home?

With the Configurator design tool, Groke gives you the opportunity to preview your dream door on your home in photorealistic quality – from any camera angle. Using your digital template, you can virtually install a wide range of different models and modify colours and other details, right from your own computer. The Configurator delivers realistic images so that you be certain to choose the best-looking door possible.

WWW.KREADOOR.DE

STEP 1

Take a digital picture of the entrance to your home.

STEP 2

Use the Configurator to determine which front door is the best fit for your home's entrance.

STEP 3

Select the ideal dimensions, style, colour, glass type, side sections / fanlight, and push/pull handle.

STEP 4

A simple photo composition is all it takes to visually depict your bespoke dream door right in the entrance to your home. When you're finished, you can order the door from your Groke specialist retailer using the reference number.

ENTRAsys FD - OPENS YOUR GROKE DOOR WITH A GENTLE TAP OF THE FINGER

+ Reliable biometric access control system for front doors
+ Latest-generation strip sensor with high-speed processor and low energy consumption
+ Simple access management (program/delete)
+ System cannot be manipulated: only "live" fingers can gain access
+ Memory stores approx. 50-80 fingerprints[1]), up to 9 of which can be assigned administrator rights
+ 4 controllable channels: e.g. front door, lighting, alarm system...
+ Encrypted, tamper-proof and secure wireless connection (FM 868,8 MHz, Somloq Rollingcode) to door receiver
+ Individual fingerprints can be deleted without requiring the presence of related users
+ Finger scanner installed at a height of approx. 1600 mm
+ Dimensions: 86 x 47 x 31 mm
+ Only in combination with a Secury automatic lock with electronic opener function

[1]) depending on the complexity of the fingerprints.
